

## ENZYM PERFECT

*Antibacterial and Antifungucidal Enzymatic  
for Medical Instruments, Devices Pre-Cleaning Spray Solution  
Ready to Use / Liquid  
1000 ml*

### Product Specifications

#### \*CHEMICAL COMPOSITION

5-Enzyme (Amylase, Lipase, Prosthesis, Cellulase, Mannanase), Nonionic surfactants, Benzalkonium chloride, Corrosion inhibitors and auxiliary substances.

#### \*PRODUCT FEATURES

ENZYM PERFECT It is a cleaner and disinfectant solution in spray form with enzymatic content developed for dirty instruments. Ready to use, in foam form. The spray gun is integrated into the package and gives a solution in foam form without producing aerosols during use. Thanks to its dense foam, the solution covers the instruments evenly. In particular, it prevents the drying of organic dirt in surgical instruments and prolongs the life of instruments by ensuring maximum quality cleaning. It has wide material compatibility. It rinses easily and leaves no residue on the instruments. It has bactericidal activity. It saves time and effort with its practicality of use.

#### \*AREAS OF USE

It is suitable for collecting and humidifying and disinfecting dirty medical and surgical instruments that cannot be quickly transferred to the sterilization unit. It also provides a bactericidal effect by maintaining sufficient moisture levels to prevent blood and organic matter from drying out. Materials treated with Enzym Perfect can be safely stored in solution until transferred to the sterilization unit.

#### USE

\* Before using, cover the bottom of the immersion vessel with Enzym Perfect and collect the tools here. Cover all instruments with Enzym Perfect foam. Close the lid of the dirty instrument tub. Rinse thoroughly after the required contact time

#### \*ANTIMICROBIAL PROPERTIES

1

Bactericide, fungicide
