

# MANIFOLD KIT SET

The Maccore Manifold kit set is a system used in angiography and interventional radiology procedures that simplifies the management of contrast media and pressurised fluids. It allows fluids to be routed and distributed in a controlled manner throughout the procedure.

PRODUCT NAME	REFERENCE NO.	BRAND
MANIFOLD KIT SET	MKS001	MORPHO
MANIFOLD KIT SET	MKS001	MACCORE

## MANIFOLD KIT SET

- 1 × three-way manifold body rated to 500 PSI
- 1 × 12 cc coronary syringe
- 1 × pressure line
- 1 × infusion set with drip chamber
- 1 × infusion set without drip chamber

## FEATURES

**High-Pressure Resistance:** Withstands up to 1,200 PSI, enabling safe contrast injection.

**Transparent Body:** Allows clear visualisation of fluid flow and air-bubble control.

**Large Internal Lumen:** Provides fast, uninterrupted flow performance.

**Rotating Luer Connector:** Ensures leak-free connection from any angle.

**Right-On / Right-Off Lever Valves:** Flexible design for quick, secure flow direction.

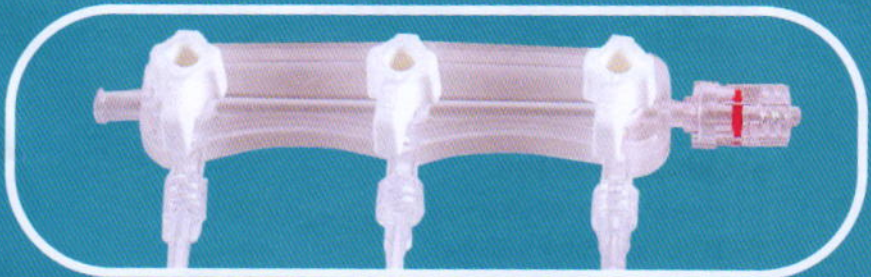

**Three-Way Valve System:** Simplifies flow control and routing.

**Compact, User-Friendly Design:** Operable with one hand for easy handling.

**Quick & Practical:** Supplied ready to use, saving valuable time.

**Compatible Connections:** Luer-Lock fittings ensure full integration with other systems.

**Sterilisation:** EO-sterilised; single-use.

### Certifications

- CE certified (MDR 2017/745)
- Complies with ISO 13485 Quality Management System
