

# TRANS RADIAL BAND

The Maccore Radial Wrist Band is designed to achieve hemostasis of the radial artery after interventional procedures. Manufactured from premium materials, it offers optimal flexibility and effective closure, making it suitable even for the most challenging vascular anatomies.

PRODUCT NAME	REFERENCE NO.	BRAND
TRANS RADIAL BAND	TRB01	MORPHO
TRANS RADIAL BAND	MTRB01	MACCORE

## CONTENTS

- 1 × radial wrist band
- 1 × Luer-lock syringe

## CERTIFICATIONS

- CE certified (MDR 2017/745)
- Complies with ISO 13485 Quality Management System

## FEATURES

**Transparency:** Provides continuous, clear visualisation of the access site, allowing safe and accurate monitoring of the hemostasis process.

**Post-percutaneous design:** Optimised specifically for radial-artery hemostasis, ensuring effective clinical performance.

**Balloon with one-way valve:** Enables personalised pressure adjustment and delivers precise, controlled hemostatic pressure.

**Ease of use & patient comfort:** Flexible, high-quality material ensures a comfortable fit. Hook-and-loop straps allow quick, secure fixation. Transparent body permits ongoing inspection of tissue beneath the band.

**Reliable hemostasis:** Applies controlled pressure to the arterial entry site, minimising bleeding risk. Helps reduce vascular complications.

**Sterilisation:** EO-sterilised; single use.
