

The Led Lavage is designed as a disposable device which combines fluid jet and vacuum tubes with lighting led for cleaning operating region from foreign materials and bacteria.

This lightweight and portable designed lavage system has double speed that can be adjusted according to the operation areas.

The Led Lavage effectively clears both bone and soft tissues from debris/contaminants and allows for throughout cleaning of the surgical operation area.

As the device can be used for open wound injuries, necrotic and infected tissues, two customized tips also included for hip and knee applications.

- **Focused Led Light**
Provides easily observe operation region
- **Tip Fixing Mechanism**
Provides easily changing the tips
- **Textured Barrel and Handle**
Ensures a secure and comfortable grip during difficult operative procedures
- **Two-Speed Rocker Switch**
Finger tip control for both high and low pressure fluid jet
- **Independent Tubes for Fluid and Suction**
Provides concentric fluid delivery and suction
- **Ergonomic Design**
Fit well to hands due to its ergonomic design

Weight (g)	210
Flow (ml/min)	1200 ml High Speed/600 ml Low Speed
Nozzle Pattern	Elliptical Orifice
Power	8 x 1.2v Cell
