ODORGO Headquarter

OdorGo

WHY THE PRO SERIES?

Concentrated Power

Contains 2x more natural odor-eliminating active ingredients than our standard series. This means superior performance even against the most difficult and persistent odors (e.g., organic waste, chemical odors, intense human or animal-related odors).

Ultra Effective Formula

Effectively performs odor control even in larger volume spaces (waiting rooms, large offices, clinics, patient care areas).

Professional Image

Creates a fresh, clean, and inviting atmosphere in your business at all times, increasing customer, patient, and employee satisfaction, and reinforcing your institution's professional image.

Ingredients

Water, Proprietary blend of natural essential oils (For more information, you can visit the International Fragrance Association's website: ifragrance.org), Lime Oil, Pine Needle Oil, Cedarwood Oil, Anise Oil, Clove Oil

Fast & Long-Lasting Solution

Increased concentration ensures faster neutralization of bad odors and a longer-lasting effect. This is ideal, especially for areas with high traffic or continuous odor production.

100% Natural and Safe Ingredients

The PRO Series, like all ODORGO products, is water-based and consists of natural plant extracts. It does not contain toxic chemicals, parabens, phthalates, or artificial perfumes harmful to humans, animals, or the environment.

Economical Use

Thanks to its concentrated formula, it delivers maximum effectiveness while using significantly less product, providing a major cost advantage.

OdorGo[®] AREAS OF USE

HOTELS

A bad-smelling hotel room, lounge, or restaurant creates dissatisfaction! Negative online reviews spread quickly, and guests stay away from these places. Unless the problem is solved at its source, no matter how meticulously the room is cleaned, the odor will soon return. Unwanted and tough odors can cause serious harm to businesses. Such situations require hotel rooms to be cleaned for extended periods, and the rooms cannot be rented out immediately, leading to revenue loss. ODORGO quickly eliminates odors at a molecular level, in a pH-neutral and permanent way. It gives the environment a pleasant and light freshness.

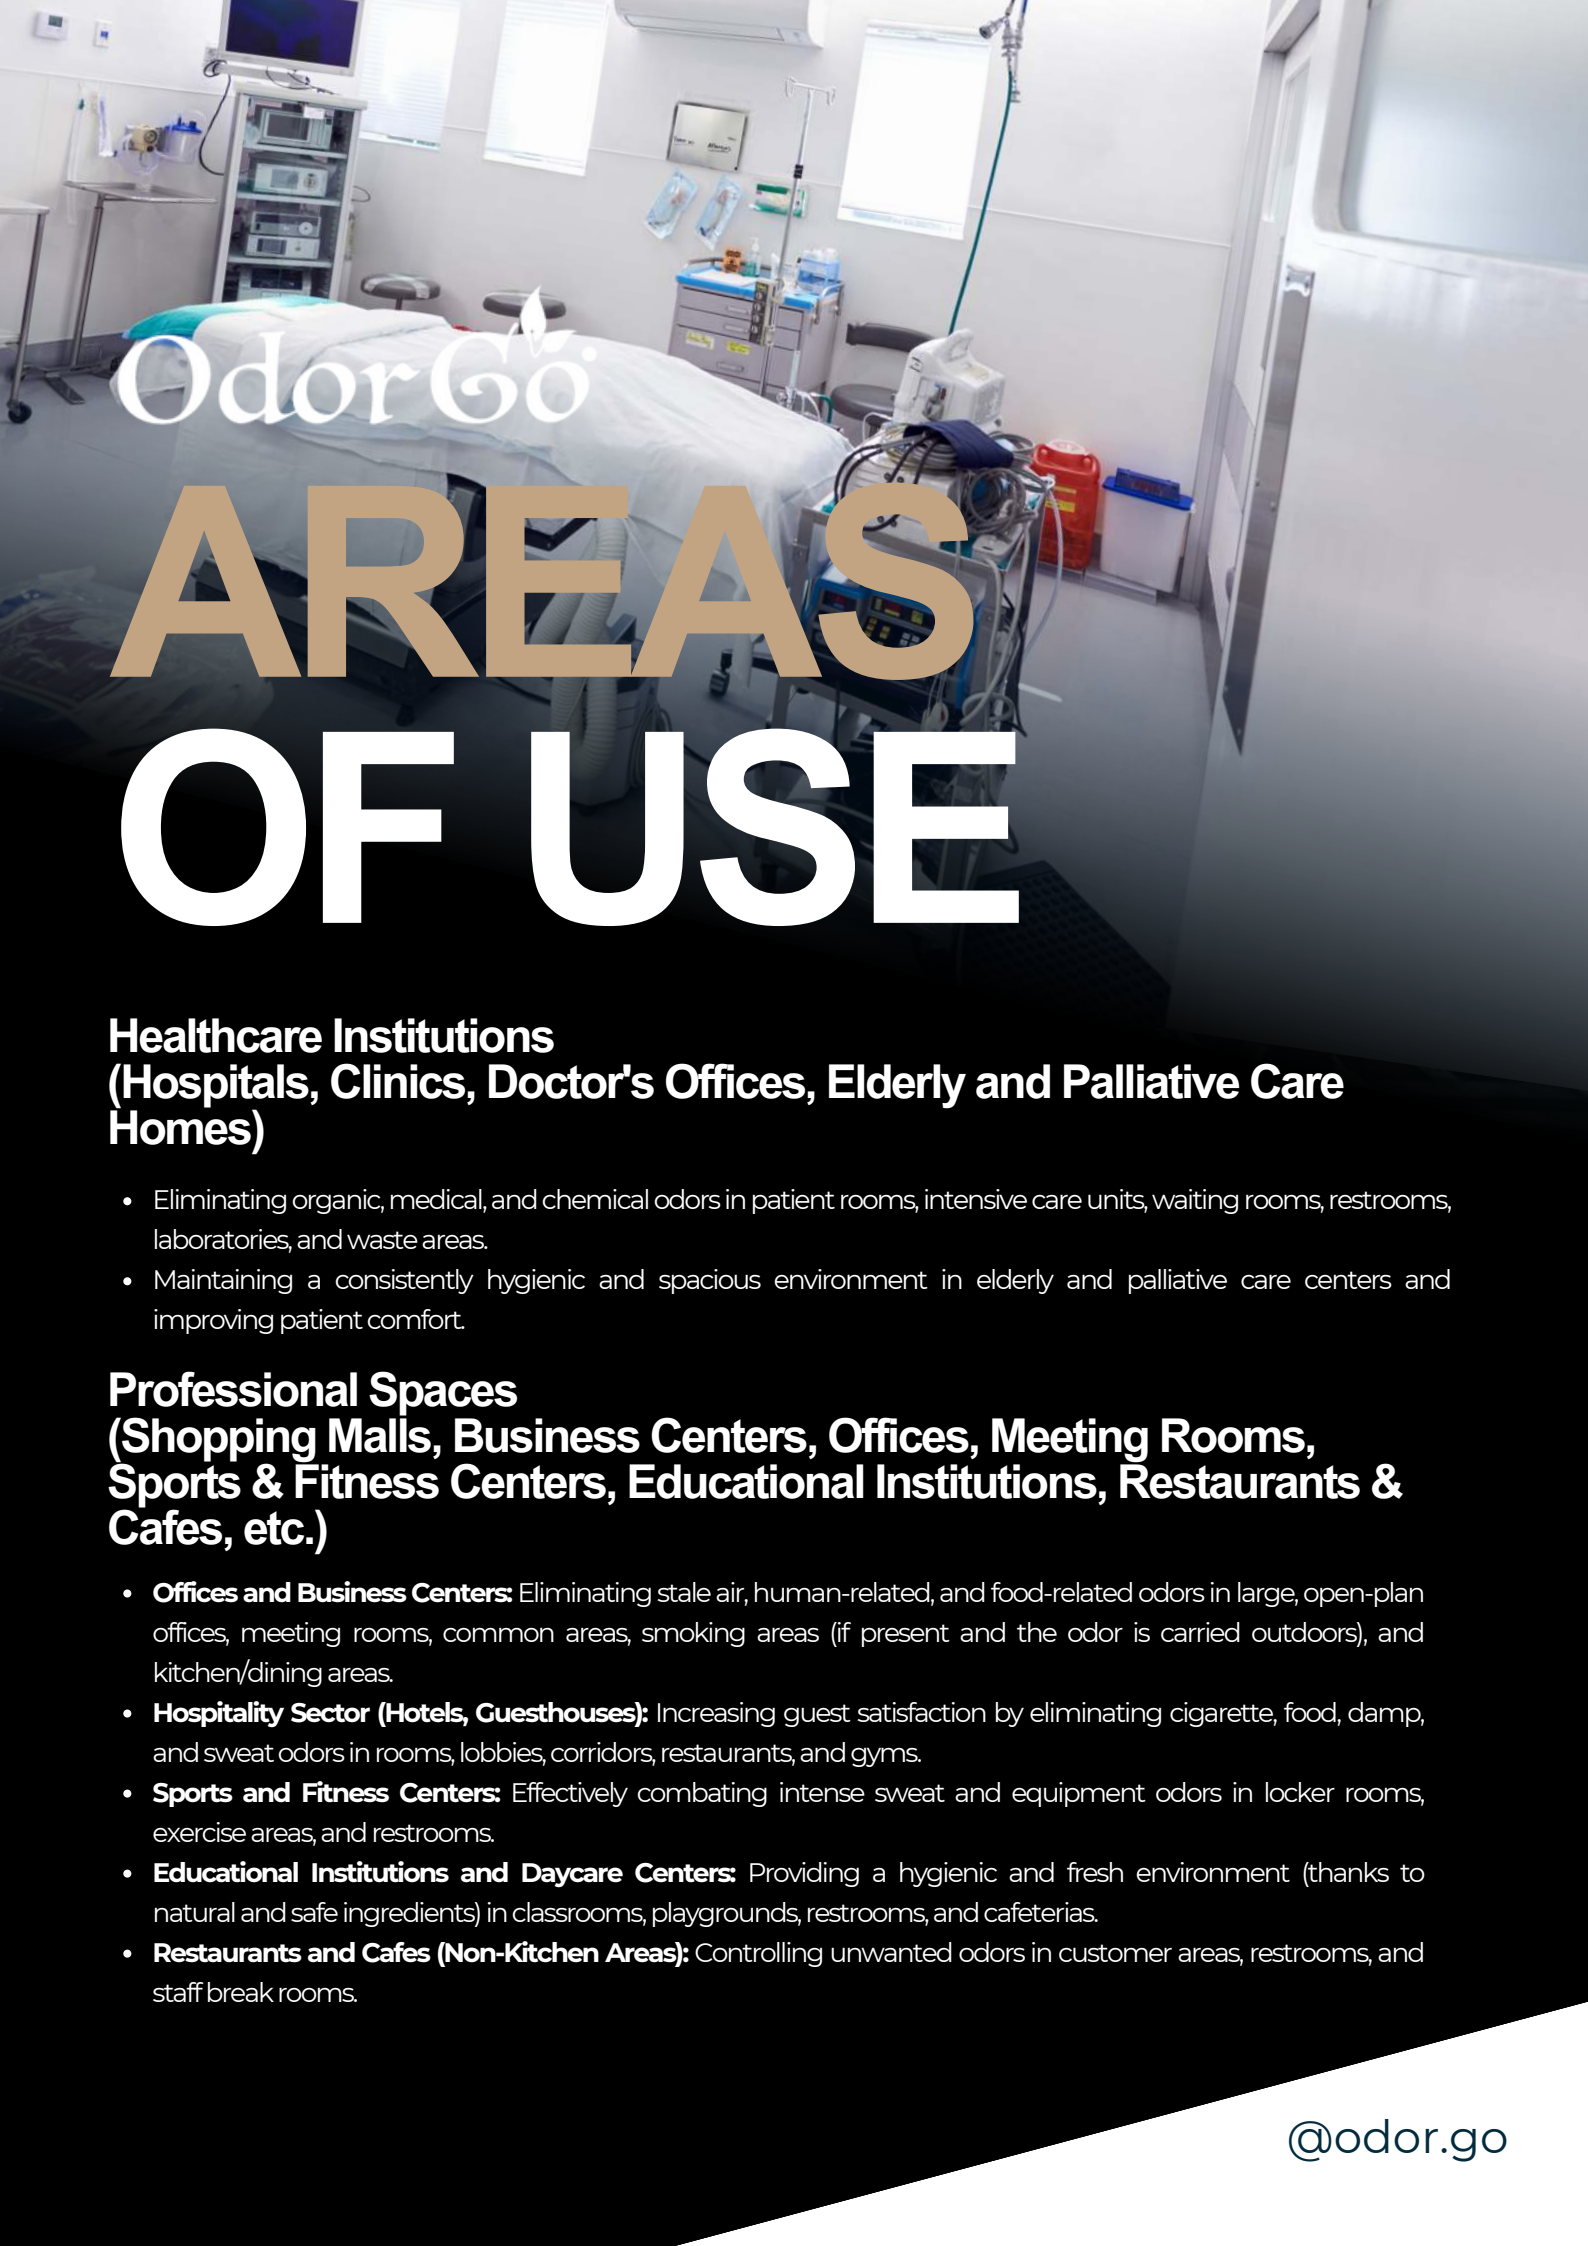

AUTOMATIVE SECTOR

Some vehicles become undesirable to use due to unwanted odors upon entry. This situation not only negatively affects rental or sales processes but can also damage the brand image. Bad odors can cause potential customers to reject the vehicle and the business to suffer a loss of prestige.

ODORGO is a pH-neutral and permanent solution that eliminates bad odors inside vehicles at a molecular level. You can achieve effective results by applying the product to headliners, seats, carpets, the trunk area, and ventilation/blower units. If the odor is very intense, it is recommended to spray it several times onto the intake point of the internal air circulation from under the hood.

After Application:

- All bad odors are permanently eliminated.
- The vehicle is immediately ready for sale or rent.
- The perception of cleanliness is increased, boosting customer satisfaction.

OdorGo

AREAS OF USE

Healthcare Institutions (Hospitals, Clinics, Doctor's Offices, Elderly and Palliative Care Homes)

- Eliminating organic, medical, and chemical odors in patient rooms, intensive care units, waiting rooms, restrooms, laboratories, and waste areas.
- Maintaining a consistently hygienic and spacious environment in elderly and palliative care centers and improving patient comfort.

Professional Spaces (Shopping Malls, Business Centers, Offices, Meeting Rooms, Sports & Fitness Centers, Educational Institutions, Restaurants & Cafes, etc.)

- **Offices and Business Centers:** Eliminating stale air, human-related, and food-related odors in large, open-plan offices, meeting rooms, common areas, smoking areas (if present and the odor is carried outdoors), and kitchen/dining areas.
- **Hospitality Sector (Hotels, Guesthouses):** Increasing guest satisfaction by eliminating cigarette, food, damp, and sweat odors in rooms, lobbies, corridors, restaurants, and gyms.
- **Sports and Fitness Centers:** Effectively combating intense sweat and equipment odors in locker rooms, exercise areas, and restrooms.
- **Educational Institutions and Daycare Centers:** Providing a hygienic and fresh environment (thanks to natural and safe ingredients) in classrooms, playgrounds, restrooms, and cafeterias.
- **Restaurants and Cafes (Non-Kitchen Areas):** Controlling unwanted odors in customer areas, restrooms, and staff break rooms.

OdorGo

ODORGO PRO Series Products

ODORGO PRO Odor Eliminating Spray;

Ideal for situations requiring immediate and powerful action. Can be applied to large areas or directly onto the odor source. Delivered in durable packaging suitable for heavy use.

ODORGO PRO Odor Eliminating Gel;

Provides long-lasting and continuous odor control in large spaces or areas with constant and intense odor problems (e.g., waste collection areas, large restrooms, animal shelters).

OdorGo[®] ODORGO PRO Series Products

What Makes ODORGO PRO-ACTIVE Systems Special?

- **Proven Effectiveness:** ODORGO's natural odor-eliminating solutions are proven to eliminate odors at their source, even in large areas, when applied with PRO-ACTIVE devices.
- **Natural and Safe:** ODORGO solutions, as with ODORGO products, consist of natural, safe ingredients for humans, animals, and the environment, free from aggressive chemicals. **They don't just mask odors; they eliminate them at a molecular level, leaving behind only natural, fresh air.**
- **Eco-Friendly Solution:** ODORGO PRO-ACTIVE systems rid your spaces of all bad odors using an environmentally sensitive and gentle method.
- **Certifications:** ODORGO odor-eliminating solutions meet the necessary standards for aerosol applications.
- **Ease of Transport:** A specially designed carrying cart that allows ODORGO PRO-ACTIVE devices to be easily moved from one point to another.

ODORGO Super Concentrate D100 Odor Elimination System

Our silent and invisible odor elimination solution for large spaces

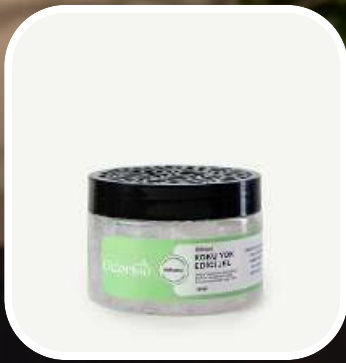

ODORGO PRO-ACTIVE Application Devices

Classic, Professional & Mini Models

ODORGO PRO-ACTIVE Mobile Odor Neutralization Generators are ergonomic, self-sufficient professional devices. Through a special distribution system, they disperse ODORGO's natural odor-eliminating solutions into the environment in the form of micro-particle aerosols, purifying and freshening the air of the space from unwanted odors. Thanks to their ease of use and different size options, ODORGO PRO-ACTIVE devices are ideal, especially in large areas or those with challenging odor problems.

ODORGO PRO-CLEAN Catalytic Accelerator

The ODORGO PRO-CLEAN Mobile Neutralization Accelerator is designed as a complementary device, especially for professional odor elimination applications using ODORGO's natural odor-eliminating solutions via the aerosol method. It allows the odor-eliminating active ingredients in the environment to react more quickly and effectively, and shortens the air neutralization time. As a result, treated areas become ready for use in a shorter time. It can be used in sensitive environments such as medical areas, laboratories, and pharmaceutical production facilities, as well as in commercial and private properties.

OdorGo

ODORGO GEL

& Wall Mount Corporate Use

In high-traffic areas like malls, hospitals, hotels, schools, and offices, restroom and common area hygiene is the most important indicator of corporate image. Traditional solutions offer momentary effects, but bad odors quickly return, and unaesthetic fixtures spoil the overall design of the space.

ODORGO brings a fundamental solution to this problem by combining its natural Odor Eliminating Gel with a professional wall-mount bracket, transforming it into a flawless system for public spaces. Now, freshness is both effective and invisible.

Why the ODORGO Gel and Mounting System?

Full Architectural Harmony: Our specially designed mounting brackets are made from a special material that can be painted in any desired color. This allows them to blend perfectly with your space's existing architecture and color palette, preserving decorative integrity.

Secure and Practical Mounting: Instead of leaving the ODORGO Gel on a countertop or the floor, you can securely mount it on walls or in ceiling corners. This both prevents theft and vandalism and facilitates the work of cleaning staff, offering a more professional appearance.

Effective and Measurable Affective Area: Each ODORGO Gel provides weeks of continuous and effective odor neutralization in an area of approximately 15m². This allows you to easily plan the required number of products and control costs.

OdorGo GEL w/ Koleksiyon

You don't have to compromise on aesthetics while cleaning your environment's air

ODORGO's revolutionary odor-eliminating technology has come together with the timeless and minimalist concept of Türkiye's leading design brand, Koleksiyon Mobilya. Now, for use in all corporate spaces and homes, the ODORGO Gel that eliminates bad odors **also transforms into a sophisticated style-adding decorative object for your space.**

These special containers, specially designed by Koleksiyon Mobilya with matte black and pearl white color options, elegantly conceal the power of ODORGO Gel.

Our gel, providing weeks of continuous freshness in every 15m² area, is no longer a product to be hidden, but a design element to be proudly displayed in the most stylish corner of your living room, bathroom, or office. Freshness is no longer just felt, it is also seen.

With the ODORGO X Koleksiyon Mobilya collaboration, take a clean breath in your living spaces and make a difference with design.

Make Your Space's Signature with Scent: ODORGO Corporate Design Luxury Candle Series

The most powerful element that defines a space in memory is its atmosphere. A luxurious hotel lobby, a prestigious meeting room, a premium store, or a restaurant that wants to host its guests in the best way... Success is hidden in the details, and scent is the most effective of these details. With this understanding,

ODORGO presents its new Luxury Candle series, specially designed to elevate the identity and prestige of corporate spaces. This is not just a candle; it is a design object that reflects your brand's identity, creating a sophisticated ambiance while cleaning the air.

What is the Difference with the ODORGO Luxury Candle Series?

Thanks to ODORGO's patented odor-eliminating technology, our new candle series offers a dual effect:

- It neutralizes unwanted background odors (e.g., air conditioning, crowds, external factors) at a molecular level.
- It leaves a lasting and distinguished signature scent in your space with specially designed, subtle, and elegant essential oil blends.

Areas of Use and Strategic Advantages:

- **Hotels and SPA Centers:** Greet your guests with a luxurious, clean, and peaceful atmosphere from the moment they walk in. Take the first step towards brand loyalty and an unforgettable accommodation experience.
- **Offices and Meeting Rooms:** Create a work environment that reduces stress, increases focus, and boosts employee motivation. Reflect your brand culture and prestige to your guests and team.
- **Stores and Showrooms:** Create an inviting and luxurious ambiance that encourages your customers to stay longer in your store and positively influences their purchasing decisions.
- **Restaurants and Lobbies:** Elevate the customer experience by enriching waiting areas and private rooms with a sophisticated scent that reflects your brand's quality.
