

ColinDental

Special Solutions for  
Dentists and Researchers

## Colin Kimya Sanayi ve Ticaret A.Ş.

Founded in 2000 in Istanbul, Colin started its journey with the principle of producing specialized products, adopting the mission of becoming a leading chemical company in its field. Since its establishment, the company entered the sector by manufacturing textile auxiliary chemicals and is now managed by an experienced team specializing in the production of biochemical solutions.

### Product Development and R&D-Focused Activities

In 2015, Colin began producing biochemical solutions under its own brand, and since 2020, it has continued production with dozens of products developed entirely by its in-house Colin R&D team. The company specializes particularly in testing, analysis, washing, preparation of environments, and sanitization solutions.

### Competence in the Medical Field

Colin operates in the medical field under the title of "authorized medical device manufacturer" granted by the Ministry of Health. Its products are registered in the Ministry of Health's Product Tracking System (ÜTS) and are offered to hospitals, clinics, and test laboratories either directly or through sub-dealers.

### Strong R&D Infrastructure

With its robust R&D infrastructure, Colin consistently demonstrates the ability to respond rapidly to market demands. The company contributes to the sector by producing universal-quality equivalent products compatible with various device groups used in medical testing and analysis laboratories. Colin's R&D team works intensively to develop new products.

### Scientific Contributions and Collaborations

Colin actively participates in national and international congresses through scientific and sponsorship support and collaborates with Turkey's leading academics. These scientific partnerships play a significant role in enhancing the quality of the company's products and introducing innovative solutions to the sector.

Colin continues its vision of delivering top-tier service to its customers by combining innovation, trust, and quality. Join the Colin family and step confidently into the future shaped by science.

## Special Solutions for Dentists and Researchers

### Special Solutions for Dentists and Researchers

We support your scientific studies and clinical applications with high-purity solutions and hygiene products developed for dentistry and biomedical research. Our products are manufactured in compliance with quality standards and are specially formulated for dental materials, biocompatibility testing, and laboratory use.

### Solutions: Reliable and Standardized Formulations for Your Laboratory Work

From artificial saliva and stomach acid to remineralization solutions and buffer solutions, we offer a wide range of products used in dental and biomedical research. All our solutions are designed to provide consistent and reliable results in laboratory testing.

#### Featured Products:

Artificial Saliva Solution - DN 53160-1

Artificial Saliva Solution (AFNOR 591-141)

Artificial Stomach Acid Solution (pH ~ 1.2)

Artificial Stomach Acid Solution + Urea (pH ~ 1.2)

Artificial Sweat Solution - DN 53160-2

Demineralization Solution

Isotonic Solution - 0.9 g/l NaCl Solution

Remineralization Solution

Remineralization Solution (Xylitol)

0.01 M EDTA Solution (0.01 mol/l)

0.1 M EDTA Solution (0.1 mol/l)

Hydrochloric Acid Solution (0.1 M) 0.1 N

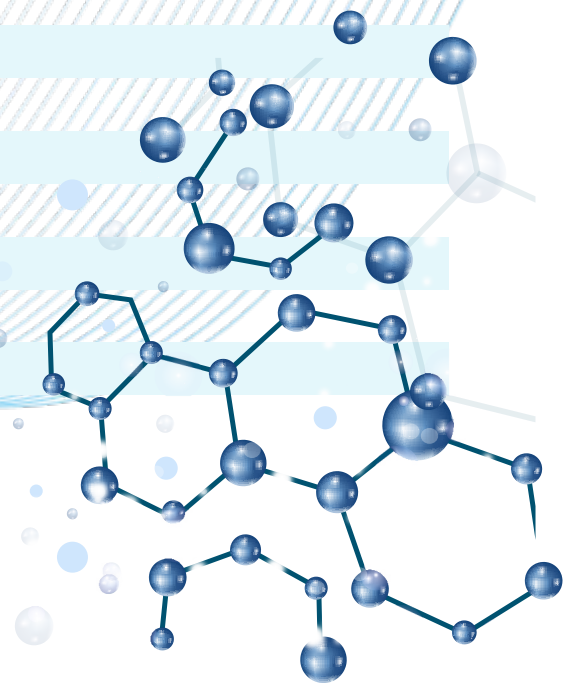

Sodium Hydroxide Solution (0.1 M)

Phosphate Buffered Saline (PBS) pH 7.4

Isotonic Solution - 0.9 g/l NaCl Solution

Isotonic Solution 20X (Concentrated)

## Special Solutions for Dentists and Researchers

### Hygiene Products

#### Powerful Disinfection and Cleaning for Clinics and Laboratories

A sterile and hygienic environment is crucial for both patient health and sensitive laboratory work. Our **ULTRACOL** hygiene product series is specially formulated for dentists, research laboratories, and medical device manufacturers, ensuring high-performance cleaning and disinfection in compliance with international health and safety standards.

Proper hygiene practices are essential in preventing cross-contamination, maintaining equipment longevity, and ensuring safe working conditions. Our innovative formulas effectively eliminate bacteria, viruses, and biofilm residues while being gentle on medical instruments and surfaces. Whether for routine cleaning, deep disinfection, or specialized treatments, our solutions are designed to meet the highest professional standards. The **ULTRACOL** series offers a comprehensive range of alkaline, acidic, and neutral formulations to suit various cleaning and sterilization needs. From peracetic acid-based high-activity disinfectants to specialized cleaners for dental appliances and medical instruments, each product is crafted to provide superior efficacy without compromising safety.

By integrating **ULTRACOL** hygiene products into your daily workflow, you can enhance infection control, protect valuable equipment, and create a safer environment for both patients and professionals.

#### Featured Products:

ULTRACOL ACTIV - Disinfecting agent that can clean medical devices

ULTRACOL FNP - Alkaline Neutralizer and Rust Remover Cleaning Agent

ULTRACOL FNZ - Acid Neutralizing Liquid Cleaning Agent

ULTRACOL FORTE - Peracetic Acid based high activity disinfectant

ULTRACOL FR - Alkaline Liquid Cleaning Agent

ULTRACOL PRO 3 - Dental Plaque and Appliance Cleaner

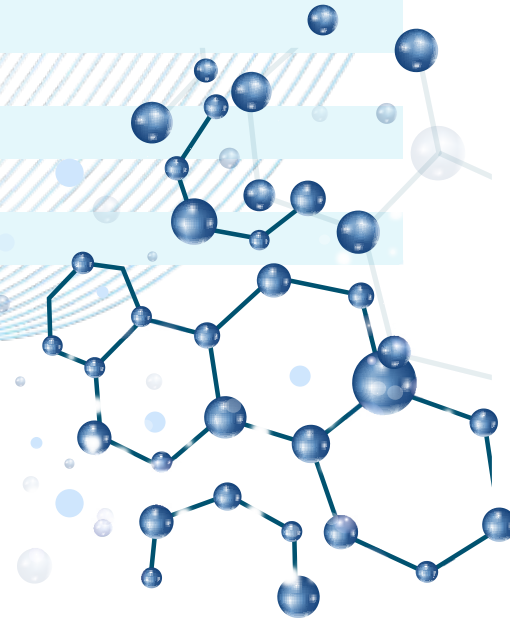

ULTRACOL PULVER - Effective cleaning agent for medical instruments and surfaces

ULTRACOL SPX - Degreasing Detergent

ULTRACOL CLEAN SA - General Cleaning Detergent

ULTRACLEANER - Multi-Purpose Hand and Surface Cleaner
